

Getting Published with IEEE

Qing Li

IEEE Client Services/University Partnership Manager

2014

Publish with IEEE by following four main steps

- 1. Choose** an IEEE periodical
- 2. Prepare** your manuscript
- 3. Submit** your article
- 4. Review** process

Choose

1. Choose an IEEE periodical

Publish

IEEE journal or IEEE conference?

- A **journal article** is a fully developed presentation of your work and its final findings
 - Original research results presented
 - Clear conclusions are made and supported by the data
- A **conference article** can be written while research is ongoing
 - Can present preliminary results or highlight recent work
 - Gain informal feedback to use in your research
- Conference articles are typically shorter than journal articles, with less detail and fewer references

What are the opportunities to publish at IEEE?

170+

Journals, Transactions,
Magazines

Journals

- Journals, Transactions, and Letters are the primary means for publishing technical papers concerning original work in IEEE fields of interest.
- The primary purpose of Journals, Transactions, and Letters is to disclose and provide a permanent archival record of original technical work that advances the state of the art or provides novel insights.
- Letters are for the publication of brief papers, usually three to four pages in length.

Magazines

- Magazines are characterized by regular and continuing issues with significant technical content in addition to general news and regular columns

- IEEE Communications Magazine
- IEEE Microwave Magazine
- IEEE Signal Processing Magazine
- IEEE Instrumentation & Measurement Magazine

... 7 ...

MTT Journals& Magazines

	Transactions	Letters	Magazine
New Research Article	YES(6pages, over-lengthcharge)	YES(3pages)	NO
Tutorial Article	YES(atexpert level)	NO	YES(atFundamental toIntermediatelevel)
Application Note	NO	NO	YES
Review Article	YES(atexpert level)	NO	YES(atFundamental toIntermediatelevel)

- ❑ **Research Article:** Papers in the journals use the IEEE standard format and must include a Title, Abstract, Introduction, Technical Content, Conclusions, and References. The transactions also include the author biographies.
- ❑ **Tutorial:** Unique presentation of known material. Valuable methodologies, exhaustive references
- ❑ **Application Note:** Describe current application of technology: circuits, systems, models, concepts.
- ❑ **Review:** Historical account of field, exhaustive references, explanation of state-of-the-art, indications of future research

Publish your research where it will have the most impact

Aims & Scope

The *IEEE Transactions on Microwave Theory and Techniques* is published monthly with a focus on that part of engineering and theory associated with microwave/millimeter-wave technology and components, electronic devices, guided wave structures and theory, electromagnetic theory, and Radio Frequency Hybrid and Monolithic Integrated Circuits, including mixed-signal circuits, from a few 100 MHz to THz.

Author Information - Transactions

How to prepare a manuscript for submission to the IEEE Transactions on Microwave Theory and Techniques? Follow the checklists:

new manuscript	revised/resubmitted manuscript	final manuscript
----------------	--------------------------------	------------------

To further help you prepare the manuscript, here are the **specific criteria reviewers are asked to check when reviewing a manuscript**:

- The Transactions on Microwave Theory and Techniques only accepts new and original articles describing significant work and/or ideas not found elsewhere in the literature. Is this work a new and original contribution in the area of Microwave Theory and Techniques?
- The Transactions does not accept incremental submissions. After considering all prior work published by the authors, including the conference paper if this is an expanded paper, and others, would you characterize this submission as incremental? For example, after removing the previously published material from this submission, how much of the new material left is worthy of publication?
- All related previous work by the authors must be referenced, even if it was presented in conference. Is previous work by the authors properly referenced?
- Is the work of others properly referenced?
- The Transactions generally requires that theory, measurements, and simulations be supported by careful comparisons. Do the theory, measurements, and simulations presented meet this requirement? All components and circuits must have measured results to verify the simulations; does the paper have this data?
- Please comment on the organization, quality of the writing, spelling and grammar. Does this manuscript need grammatical revision?
- How significant is this work?

papers of three pages or less should be submitted to the IEEE MICROWAVE AND WIRELESS COMPONENTS LETTERS. The mandatory overlength page charge of \$200 per page applies to each page in excess of 6 pages. Note that there is an option of **Open Access** when submitting the manuscript. If Open Access is selected, the overlength page charge will be waived and an open-access fee of \$1750 will be billed if the paper is accepted for publication. This new policy, approved by MTT-S AdCom, is different from the standard policy of [IEEE Open Access](#).

Important IEEE Policy Announcement

- The IEEE reserves the right to exclude a paper from distribution after the conference (including its removal from IEEE Xplore) if the paper is not presented at the conference.

Papers are reviewed on the basis that they do not contain plagiarized material and have not been submitted to any other conference at the same time (double submission).

These matters are taken very seriously and the IEEE Communications society will take action against any author who engages in either practice. Follow these links to learn more:

- [IEEE Policy on Plagiarism](#)
- [IEEE Policy on Double Submission](#)

Submit Your Manuscript in 5 Easy-To-Complete Steps

1. First, tell us if you are a new customer or a returning one.
 - a. *New Customer?* Simply click on the "Register" link **here** or below to set up your personal account. When you do, you will be asked to complete our online registration form. After submitting the completed registration form, you will be sent an e-mail that includes a link to click on to access your newly created account.
 - b. *Returning Customer?* Simply click on the "Login" link **here** or below, enter your e-mail address and password, and you will immediately gain access to your existing account.

Aims & Scope

IEEE Journal on Selected Areas in Communications focuses on all telecommunications, including telephone, telegraphy, facsimile, and point-to-point television, by electromagnetic propagation, including radio; wire; aerial, underground, coaxial, and submarine cables; waveguides, communication satellites, and lasers; in marine, aeronautical, space, and fixed station services; repeaters, radio relaying, signal storage, and regeneration; telecommunication error detection and correction; multiplexing and carrier techniques; communication switching systems; data communications; and communication theory.

4. Review process

The Review Process

1. Paper received
2. Sent to Editor-in-Chief
3. Assigned to Associate Editor
4. Reviewers contacted
5. Reviewers accept task
6. When the reviews are received, the Associate Editor makes a recommendation to the Editor-in-Chief
7. Editor-in-Chief makes final decision

The steps in this review process vary by publication.

Possible review decisions

- **ACCEPT:** Congratulations! The paper now is entered into a production process.
- **ACCEPT WITH MINOR CORRECTIONS:** One or more of the referees have made suggestions for improvement.
- **RESUBMIT:** The paper has major deficiencies that could be repaired by the author.
- **REJECT:** If you have a rejection from a top publication, you can try submitting the paper to a less prestigious publication.

Audience

Why IEEE editors and reviewers reject papers

- The content is not a good fit for the publication
- There are serious scientific flaws:
 - Inconclusive results or incorrect interpretation
 - Fraudulent research
- It is poorly written
- It does not address a big enough problem or advance the scientific field
- The work was previously published
- The quality is not good enough for the journal
- Reviewers have misunderstood the article

Last, Not the Least

Ethics in Scientific Publishing

Ethics

Types of misconduct

Conflict of Interest

- A financial or other relationship with the publication at odds with the unbiased presentation of data or analysis

Plagiarism

- Copying another person's work word for word or paraphrasing without proper citation

Author Attribution

- Must be given if you use another author's ideas in your article, even if you do not directly quote a source

Author involvement/ contributions

- Include any and all who have made a substantial intellectual contribution to the work
- Do not include minor contributors

Ethics

Ethical publishing

Plagiarism

- Avoid plagiarism
 - Cite and separate any verbatim copied material
 - Paraphrase reused text properly, and include citation
 - Credit any reused ideas
 - Familiarize yourself with IEEE Policies

Refer to our Tips Sheet
http://www.ieee.org/publications_standards/publications/authors/plagiarism_and_multiple_submissions.pdf

Ethics

Ethical publishing

Duplication, Redundancies & Multiple Submissions

- Author must submit original work that:
 - Has not appeared elsewhere for publication
 - Is not under review for another refereed publication
 - Cites previous work
 - Indicates how it differs from the previously published work
 - Authors MUST also **inform the editor** when submitting any previously published work

Refer to our Tips Sheet
http://www.ieee.org/publications_standards/publications/authors/plagiarism_and_multiple_submissions.pdf

Next Steps

Where to begin

Check Xplore

- Browse or search for title;
where does your paper belong

Places to submit

- Check the IEEE call for papers/conference calendars here:
https://www.ieee.org/conferences_events

For more information on writing a Technical Paper
