注意事項

- 【Journals Term List】的匯入是適用於個別的EndNote Library檔案，因此如果使用者有多個EndNote Library檔案就必須分別執行匯入，並非一部電腦只需要匯入一次。
- 如果已經採用【方法一】匯入期刊縮寫清單仍沒有相對應的縮寫格式，那就必須以【方法二】單筆修正資料。

References

In the main text, tables and figure legends:

- References should be identified using superscript numbers, be numbered consecutively in order of appearance in the text, and be placed after punctuation.
- References cited in tables or figure legends should be included in sequence at the point where the table or figure is first mentioned in the main text.

In the References section:

- References should be limited to those cited in the text and listed in numerical order, NOT alphabetical order.
- Do not cite abstracts unless they are the only available reference to an important concept.
- Do not list uncompleted work or work that has not yet been accepted for publication (e.g. personal communications, unpublished data) as references.
- References should include, in order, author names, article title, journal name, year, volume, and inclusive page range numbers. If there is only 1 page, state if the article is an abstract or letter. The last names and initials of all the authors up to 6 should be included, but when there are more than 6 authors, include the last names and initials of the first 6 authors only, followed by “et al”.
- Abbreviations for journal names should conform to those used in MEDLINE.
- If citing a website, provide the author information, article title, website address and the date you accessed the information.

Examples are given below.

Journal articles:

Chen CC, Wang SS, Tsay SH, Lee FY, Lu RH, Chang FY, et al. Effects of nitric oxide synthase inhibitors on retrograde bile salt-induced pancreatitis rats. *J Chin Med Assoc* 2004;67:9-14.

gle-pulse TMS in clinical research. It also indicates that the cardiac rhythm is chiefly modulated by heart itself.

The pathogenesis of ET still remains uncertain. The study of pathology has not showed any evidence of structure lesion in the brain.¹⁵ TMS was able to reset the rhythm of ET but not the heart beat. Also, the pacing mechanism was different between ET and heart beat. Positron emission tomography of patients with ET reveals increased cerebellar activity at rest and during tremor, indicating that cerebellum has an important role in the generation of ET through the mechanism of oscillation within cerebello-olivary path-

End of Paragraph
Tab
Forced Separation
Link Adjacent Text
Singular/Plural

- **End of Paragraph**：如果您的書目格式是需要換行的，您就需要點選End of Paragraph 來做換行的動作。
- **Tab**：如果您的書目格式，與前段文字距離較大時，您可以使用Tab符號，來做一個大區隔。
- **Link Adjacent Text (◇)**：將文句串聯一起，不因頁數或文字而中斷。例如，卷期與頁碼是必須連在一起，不可分開，這裡就可以用Link Adjacent Text符號”◇”來做連結
- **Singular/Plural (^)**：依據資料的單複數，改變連接的敘詞。例如：只有單一頁或是多頁時，使用的符號不一，這時，就可以使用Singular/Plural符號”^”來做區別。
- **Forced Separation (|)**：與Link Adjacent Text剛好相反，是要分隔符號與欄位，使其失去依附關係。
- **Field Names in Bibliographies (`)**：參考文獻中要出現的字串，剛好與欄位名稱相同時。例如在期刊的卷期數字前加上“Volume:”或“Issue:”，或在編輯者後方加上“Editor”。此時需以(`)符號將字串前後包覆。

The screenshot displays the EndNote X7 software interface. The title bar at the top reads "EndNote X7 - [My EndNote Library_01.enl]". The menu bar includes "File", "Edit", "References", "Groups", "Tools", "Window", and "Help". The "Tools" menu is open, showing options such as "Search Library...", "Spell Check", "Cite While You Write [CWYW]", "Online Search...", "Format Paper", "Change/Move/Copy Fields...", "Sync", "Open Term Lists", "Define Term Lists...", "Link Term Lists...", "Sort Library...", "Recover Library...", "Find Broken Attachment Links...", "Library Summary...", "Subject Bibliography...", and "Manuscript Templates...". The "Sync" option is highlighted with a red box. A red circle with the number "1" is placed over the "Sync" button in the toolbar. Another red circle with the number "1" is placed over the "Sync" button in the "Tools" menu. A blue callout box with white text is overlaid on the right side of the screen, containing the following text:

1.回到單機版My EndNote Library_01，點選Tools→Sync (或是點選工具列上的藍色快捷鍵)，同步單機版和線上版的書目資料

The background of the interface shows a list of references under the "My Library" tab. The list includes entries for "2014 H7N9: Pre...", "2014 Development of reverse-transcription loop...", "2014 Evaluation of Plasma Exchange and Continu...", "2014 Filament-Producing Mutants of Influenza A/...", "2014 Prognosis and survival of 128 patients with ...", "2014 Protection of Mice against Pandemic H1N1 ...", "2014 Angiotensin-converting enzyme 2 (ACE2) m...", and "2014 Novel Avian-Origin Influenza A (H7N9) in Cri...". The right side of the interface shows a "Reference" pane with details for a selected entry, including "Reference Type: Journal Article", "Rating", "Author: Arima, Y", and "Volume: 4".

2.執行同步時，EndNote會提醒您作單機版端的備份，以防因網路不穩或其他因素導致您同步中斷，因此請點選「是」，另作一個備份(.enlx)儲存於您電腦的桌面或是隨身碟中。

建議將此勾勾拿掉，避免它自動執行同步！

同步完成後，您再點選 Edit→ Preferences，即會發現EndNote會自動記憶您目前申請的這個Online帳號與此單機版的My EndNote Library_01作同步了
