☐ Addressing Global Mortality from Ambient PM2.5

by Joshua S. Apte, Julian D. Marshall, ..., Michael Brauer

Environmental Science & Technology • 2015 • OA Gold • DOI

✳ 244 citations 311 readers 56 social media interactions PlumX Metrics

Ambient fine particulate matter (PM2.5) has a large and well-documented global burden of disease. ... Moreover, forecasted demographic and epidemiological transitions in India and China imply that to keep PM2.5-attributable mortality rates (deaths per 100 000 people per year) constant, average PM2.5 levels would need to decline by ~20-30%

The image shows the homepage of the Journal of Gynecology and Women's Health (JGWH). The header includes the journal's logo and name. Below the header is a navigation bar with links: JGWH Home, Classification, Guidelines, and Journal. A prominent 'Editorial Board' section is visible. On the left, there is a 'Custom Search' box. Below it, a green progress bar indicates the 'Impact Factor' for the 2017-18 period, with a value of 0.621. To the right, under the 'Editors' section, the name 'Pietro Valeri' and affiliation 'Policlinico-Vittorio' are partially visible.

The image shows the 'Welcome to Journal Citation Reports' interface. It prompts the user to 'Search a journal title or select an option to get started'. A search bar is present with the text 'Enter a journal name'. Below the search bar, the ISSN '2474-7602' has been entered. A red box highlights the message 'No results found' below the search bar. At the bottom, there are three main navigation options: 'Browse by Journal', 'Browse by Category', and 'Custom Reports'.
